Job description

We are seeking a talented and experienced **AI Engineer** to join our team. We're a dynamic and innovative AI start-up passionate about bringing cutting-edge products to market, searching for an individual who can lead the charge in developing web applications that make an impact in the lives of millions.

Role and Responsibilities:

We are seeking a **AI Engineer** to join our backend python team at Belva. As an AI / ML Engineer, you will work closely with our ML and Data Engineers to turn Machine Learning models and data pipelines into robust software applications.

Applied

have a solid understanding LLM prompt development, You will be working as a part of a highly experienced and fast moving team of passionate product builders.

Duties / Responsibilities:

- 2+ years industry experience
- Strong expertise in Python
- Experience in deploying user-facing transformer based systems in production
- Experience in Machine Learning algorithms and hands-on experience with ML toolkits like TensorFlow or PyTorch is a plus
- Outstanding spoken and written communication skills
- Highly motivated, creative, organized and a strong problem solver
- Experience with prompt development using LLM's such as ChatGPT, Llama 2, Claude 2, etc.
- Experience fine-tuning LLM's and building them from scratch

Required Skills/Abilities:

- Bachelor's degree in Computer Science, Software Engineering, or a related technical field.
- **Must be a Citizen or Green Card Holder and live in the United States**
- Minimum of 2 years of professional experience as an AI / ML Engineer in production environments.
- Solid understanding of Python deployment best practices, including dependency management, virtual environments, containerization, etc.
- Solid knowledge of continuous integration and continuous deployment (CI/CD) practices and the ability to set up and manage automated deployment pipelines.
- Proven track record of delivering high-quality, production-grade software solutions in a fast-moving team environment.
- Work with other teams (i.e., Product, PM, etc.) to ensure delivered code meets specifications based on functional/technical specifications.
- Create unit and integration tests to fully test and regress software. Break down complex requirements into independent coding tasks and strategies.

**Qualifications and Experience:**

- **Must be a Citizen or Green Card Holder and live in the United States**
- B.S. in Computer Science or equivalent experience
- 2+ years of professional experience as an AI / ML Engineer.
- Excellent problem-solving skills and the ability to tackle complex challenges.
- Prior experience in leadership or mentorship roles is a plus.
- Strong verbal and written communication skills.
- Openness to new ideas and an unceasing desire to learn new things.

Preferred Qualifications:

- Experience with database systems such as PostgreSQL and MongoDB.
- Experience with orchestration tools such as Kubernetes is desirable.
- Experience with Atlassian tools: JIRA, Confluence, etc.

Why Join Us:

- **Industry Leadership:** Become a key player in a pioneering A.I. Telecommunications company that is an

- **Professional Growth:** Embrace challenging projects that expand your skill set, foster continuous learning, and elevate your career trajectory.

We eagerly anticipate the chance to discuss how your expertise can contribute to our team's success and make a lasting difference. Your consideration is highly valued, and we look forward to the possibility of working together.
